Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607)
or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinales et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, **aux utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Monthly

Industry Price Indexes

July 1990

NOTE TO USERS

This issue contains the first monthly release of the new Industrial Product Price Indexes, 1986=100, which succeed the previously published 1981=100 Industrial Product Price Indexes. All other series included in Catalogue 62-011 are also presented on their 1986=100 time and weight base.

Historical series on the 1986 base for all previously existing series (containing data prior to 1986) are available on CANSIM, in the same matrices and under the same D numbers as the newly produced IPPI series. Historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and their corresponding 1981-based IPPI, using the year 1986 as the linking period.

An explanatory note on the method used to compute the historical series, as well as a set of concordance tables between the 86-based IPPI and 81-based series are available to the public. With this release, the series on the 1986 base become the official historical series. The 1981-based historical series will be deleted from CANSIM at the end of July 1991.

Also included in this issue is a table of link factors which are based on the June 1990 data. These link factors, which relate the old 1981=100 based series to the new 1986=100 based series, will not be revised.

The reference document: Industry Price Indexes, 1986=100: users' guide, Catalogue 62-558, will soon be available and can be ordered from Publication Sales, Statistics Canada, Ottawa, K1A 0T6. (Price: Canada, \$40.00, Other Countries \$56.00)

N° Catalogue 62-011

Mensuel

Indices des prix de l'industrie

Juillet 1990

AVIS AUX UTILISATEURS

Le présent numéro constitue la première publication mensuelle des nouveaux indices des prix des produits industriels, 1986=100, qui succèdent aux indices des prix des produits industriels, 1981=100, précédemment publiés. Toutes les autres séries apparaissant au no 62-011 au catalogue sont également présentées sur la nouvelle base temporelle et de pondération 1986=100.

Les séries historiques sur la base 1986=100 pour les indices des prix de l'industrie (contenant les données précédant 1986) sont disponibles sur CANSIM et elles apparaissent dans les mêmes matrices et sous les mêmes numéros D que les nouvelles séries IPPI maintenant produites. Les séries historiques sont calculées pour tout indice qui existait sur la base 1981=100, pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour les indices des produits suivant la classification des groupes principaux de produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et les séries IPPI correspondantes sur la base 1981=100, l'année 1986 ayant servi de période de raccordement.

Une note explicative sur la méthode utilisée pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les séries IPPI de 1986 et 1981 sont disponibles au public. Avec cette publication, les séries historiques sur la base 1986 deviennent les séries historiques officielles. Les séries sur la base 1981 seront exclues de CANSIM à la fin de juillet 1991.

Le présent numéro contient également un tableau des facteurs de raccordement basés sur les données de juin 1990. Ces facteurs de raccordement, qui permettent de faire le lien entre les anciennes séries basées sur 1981=100 et les nouvelles basées sur 1986=100, ne seront pas révisés.

Vous pourrez prochainement commander le document de référence: Indices des prix de l'industrie, 1986=100: guide aux utilisateurs, au no 62-558 au catalogue, en vous adressant à la Section des ventes des publications, Statistique Canada, Ottawa, K1A 0T6. (Prix: Canada, \$40.00, Autres pays \$56.00).

- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data which is not included in this publication are available from CANSIM.

For further information write to CANSIM Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTA

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division CANSIM, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Highlights

Industrial Product Price Index (IPPI)

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986=100) edged down 0.2% to 109.2 in July 1990, from June's level of 109.4. This slight decrease follows a similar 0.2% decrease in June 1990. The largest index increases this month were shown by the petroleum and coal products, estimated at 0.8%, followed by the primary metal products (0.4%). These were more than offset by the decreases in the autos, trucks and other transport equipment (-0.6%), paper and paper products (-1.0%) and knitted products and clothing (-2.0%). The 1.2% strengthening, in July, of the Canadian dollar versus its U.S. counterpart and its downward impact on prices of exported goods and products affected mainly the autos, trucks and other transportation equipment and paper and paper products indexes.

Since July 1989, the IPPI has fallen 0.5%. Since December 1989, the year-to-year rate has remained negative, except for February (0.1%). The year-to-year change was affected most by lower prices for primary metal products (-7.0%), chemical products (-3.9%) and paper and paper products (-1.8%). These were partially offset by higher prices for petroleum and coal products (4.9%), meat, fish and dairy products (3.0%), printing and publishing (2.8%) and beverages (3.3%). Excluding petroleum and coal products, the 12-month change was -0.7%.

Following a decrease of 1.3% in June 1990, the primary metal products index rose 0.4% in July. Increases of 4.2% for copper and copper alloy products and 3.9% for nickel products led the way. With a decline of 1.3%, the aluminum products index moderated the overall increase. Over the past 12 months, the primary metal products index has fallen 7.0%, with decreases ranging from 27.8% for nickel products to 3.8% for other non-ferrous metal products but only 1.9% for iron and steel products. The copper and copper alloy products index was the only one to rise over that period, up 8.3%.

According to initial estimates, the petroleum and coal products price index rose 0.8% during the past month, largely as a result of higher prices for products other than gasoline and fuel oil. Over 12 months, the petroleum and coal index has risen 4.9%.

The index for paper and paper products showed a decrease of 1.0% in July, reflecting the downward effect of the exchange rate on export prices for newsprint paper and also a 2.5% drop in the index for the pulp group. The same downward movements were responsible for the 2.2% decline in the paper and paper products price index over the last 12 months.

The index for chemical and chemical products edged down 0.1% in July 1990 and stood 3.9% below its level of a year ago, due mainly to a fall of 9.9% in the index for industrial chemicals over the last 12 months. This reflected the weakness in prices for synthetic resins (-10.1%) and organic industrial chemicals (-17.1%).

Higher prices for pork, fresh or frozen (13.4%) and meat, cured (11.8%) helped push up the meat price index 5.0% since July 1989. Meanwhile the index for fish products was down 7.3% due mainly to lower prices for fish, fresh or frozen (-9.0%), fish fillets, steaks, sticks (-4.5%) and fish, canned (-17.3%).

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1986=100) se situait en juillet 1990 à 109.2, en baisse de 0.2% par rapport au niveau de 109.4 de juin 1990. Ce léger recul suit une baisse de 0.2% affichée en juin 1990. Les principales augmentations ce mois-ci ont été affichées par l'indice des produits du pétrole et du charbon, hausse estimative de 0.8%, suivi par les produits métalliques primaires (0.4%). Celles-ci ont plus qu'été compensées par les baisses affichées par les indices des autos, camions et autre matériel de transport (-0.6%), du papier et ses produits connexes (-1.0%) et des produits de tricot et vêtements (-2.0%). La hausse de 1.2% du dollar canadien face au dollar américain en juillet et son impact sur les prix à l'exportation a principalement affecté le groupe des voitures, camions et autre matériel de transport ainsi que celui du papier et produits connexes.

Depuis juillet 1989, l'IPPI a décliné de 0.5%. Depuis décembre 1989, le taux annuel est demeuré négatif sauf pour le mois de février (0.1%). La variation d'une année à l'autre a été influencée surtout par la baisse des prix des produits métalliques primaires (-7.0%), des produits chimiques (-3.9%) et du papier et produits connexes (-1.8%). Ces diminutions ont été partiellement neutralisées par les augmentations des prix des produits du pétrole et du charbon (4.9%), des viandes, poissons et produits laitiers (3.0%), de l'impression et l'édition (2.8%) et des boissons (3.3%). Sans les produits du pétrole et du charbon, la variation sur 12 mois se serait établie à -0.7%.

Après avoir connu une baisse de 1.3% en juin 1990, l'indice des produits métalliques primaires a affiché une hausse de 0.4% en juillet 1990. Les augmentations enregistrées par les produits du cuivre et les alliages de cuivre (4.2%) ainsi que par les produits du nickel (3.9%) ont mené le groupe. La baisse de 1.3% montrée par les produits de l'aluminium a tempéré le mouvement à la hausse. Au cours des 12 derniers mois, l'indice des produits métalliques primaires a reculé de 7.0%, les diminutions allant de 27.8% pour les produits du nickel à 3.8% pour les autres produits de métaux non ferreux et à seulement 1.9% pour les produits de l'acier et du fer. Seule la composante des produits du cuivre et alliages de cuivre a affiché une augmentation (8.3%).

D'après les premières estimations, l'indice des prix des produits du pétrole et du charbon a augmenté de 0.8% au cours du dernier mois écoulé, suite surtout à la hausse affichée par les produits autres que l'essence et le mazout. Au cours des 12 derniers mois, l'indice du pétrole et du charbon a affiché une hausse de 4.9%.

L'indice du papier et produits connexes a affiché une baisse de 1.0% en juillet, en partie due à l'impact du taux de change sur les prix à l'exportation du papier journal mais aussi en raison de la baisse de 2.5% pour le groupe des pâtes de bois. Les mêmes mouvements à la baisse sont en partie responsable de la baisse de 2.2% de l'indice des prix du papier et produits connexes au cours des 12 derniers mois.

L'indice des prix des produits chimiques a fléchi de 0.1% en juillet et se situait à 3.9% sous son niveau d'il y a un an, en raison surtout de la chute de 9.9% des produits chimiques industriels depuis 12 mois. Ceci reflétait la faiblesse des prix pour les résines synthétiques (-10.1%) et les produits chimiques industriels organiques (-17.1%).

Sous la poussée de prix plus élevés pour le porc frais ou congelé (13.4%) et des viandes de salaison (11.8%) l'indice des prix des viandes a affiché une hausse de 5.0% depuis juillet 1989. Par contre l'indice du prix des poissons a montré une baisse de 7.3% en raison surtout des chutes de prix de 9.0% pour le poisson frais ou congelé, de 4.5% pour les filets, tranches et blocs de poisson et de 17.3% pour le poisson en boîte.

Highlights

Raw Materials Price Index

The Raw Materials Price Index (RMPI, 1986=100) declined 2.3% between June and July 1990 to a preliminary level of 102.8. The RMPI excluding the mineral fuels component did not change. Of seven components of the RMPI, five fell in July, and two rose. Between July 1989 and July 1990, the RMPI decreased 5.5%. The RMPI excluding the mineral fuels component declined 0.5%.

The mineral fuels index was down 8.0%, as a result of an estimated 8.5% decrease in crude mineral oil prices between June and July. The index was down 16.7% from its level in July 1989, due largely to lower prices for crude mineral oil, down 17.9%.

Over the month, the vegetable products index decreased by 1.4% as prices declined for grains (-3.6%), unrefined sugar (-1.1%) and cocoa, coffee & tea (-1.6). Oilseed prices were up (0.6%). Over the year, the index declined 8.6% due to lower prices for grains (-13.4%), oilseeds (-7.1%), cocoa, coffee & tea (-3.6) and prices for unrefined sugar (-5.7%).

The animal and animal products index was down by 0.9% from June. Hog prices fell in July (-4.7%) after a rising continuously in the first half of this year (they rose 46.4% between January and June). Prices for calves for slaughter were down (10.1%), while those for cattle rose (0.6%). In an annual comparison, increases in the prices for hogs (18.3%), cattle for slaughter (5.7%), and fish (12.7%) were largely responsible for the animal and animal products index to have risen by 5.4%.

The non-ferrous metals index was up by 2.9% in July led by higher prices for concentrates of copper (7.6%), lead (8.0%) and nickel (2.0%). The index declined by 3.3% over the last twelve months as prices for most metal concentrates fell; particularly nickel (-28.9) and radio-active concentrates (-10.6%). Prices for lead concentrates, up (19.6%) and copper (11.8) had a strong offsetting effect.

Faits saillants

Indice des prix des matières brutes

L'indice des prix des matières brutes (IPMB, 1986=100) a baissé de 2.3% entre juin et juillet 1990 pour s'établir au niveau préliminaire de 102.8. L'IPMB, sans la composante des combustibles minéraux, est demeuré inchangé. Des sept composantes de l'IPMB, cinq ont diminué en juillet et deux ont augmenté. Entre juillet 1989 et juillet 1990, l'IPMB a régressé de 5.5%. L'IPMB sans les combustibles minéraux a baissé de 0.5%.

L'indice des combustibles minéraux a fléchi de 8.0% en raison des prix des huiles minérales brutes, qui ont diminué de 8.5% entre juin et juillet d'après les estimations. Par rapport à juillet 1989, l'indice accusait une baisse de 16.7% attribuable en grande partie au recul de 17.9% des prix des huiles minérales brutes.

Au cours du mois écoulé, l'indice des substances végétales a régressé de 1.4% en raison des baisses enregistrées pour les céréales (-3.6%), le sucre non raffiné (-1.1%) et le cacao, le café et le thé (-1.6%). Les prix des oléagineux ont progressé de 0.6%. En un an, l'indice a diminué de 8.6% sous l'effet de la baisse des prix des céréales (-13.4%), des oléagineux (-7.1%), du cacao, du café et du thé (-3.6%) et du sucre non raffiné (-5.7%).

L'indice des animaux et substances animales a fléchi de 0.9% par rapport à juin. Les prix des porcs ont chuté en juillet (-4.7%) alors qu'ils avaient constamment augmenté durant la première moitié de l'année (de 46.4% de janvier à juin). Les prix des veaux de boucherie étaient en baisse (-10.1%) mais ceux des bovins ont grimpé (0.6%). Sur un an, les augmentations des prix des porcs (18.3%), des bovins de boucherie (5.7%) et du poisson (12.7%) expliquent en grande partie la progression de 5.4% de l'indice des animaux et substances animales.

L'indice des métaux non ferreux a augmenté de 2.9% en juillet à cause surtout du renchérissement des prix des concentrées de cuivre (7.6%), de plomb (8.0%) et de nickel (2.0%). L'indice a fléchi de 3.3% au cours des douze derniers mois en raison de la chute des prix de la plupart des métaux, et en particulier le nickel (-28.9%) et les concentrés radio-actifs (-10.6%). Les hausses de prix enregistrées pour les concentrés de plomb (19.6%) et de cuivre (11.8%) ont exercé un effet modérateur considérable.

(1) This shows the amount by which the movement of each index would move the total in the absence of any change in the other indexes.

(1) Ce chiffre donne l'ampleur de la variation qu'occasionnerait dans l'indice d'ensemble un mouvement d'un indice donné si tous les autres indices demeuraient inchangés.

(2) These indexes are preliminary.

(2) Ces indices sont provisoires.

(1) Revised.

(1) Révisé.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.
 Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
 ss indicates the S-level commodity code (from 9 to 28)
 mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
 nn indicates either a split of the M-level commodity,
 or 91, which indicates a special aggregation
 or 99, which indicates special details.
 pppp indicates the PCG code (except for some special aggregations which include several PCGs)
 rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
 ss indique le code du niveau S des produits (de 9 à 28)
 mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
 nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
 pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
 rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)
 TABLEAU 3. Indices des prix des produits industriels, par industries et groupes d'industries(1)

1986 = 100

				Month - Mois												Annual average - Moyenne annuelle
				Jan. Janv.	Feb. Fév.	March Mars	April Avril	May Mai	June Juin	July Juill.	Aug. Août	Sept.	Oct.	Nov.	Déc.	
ALL MANUFACTURING INDUSTRIES - INDUSTRIES MANUFACTURIERES				1986	100.2	100.0	99.8	99.7	99.1	99.3	99.5	100.0	100.2	100.8	100.6	100.0

Note: Indexes for the most recent six months shown are subject to revision

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agregation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indice des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabilistes, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i , désignant sa variation de prix entre la période de référence et la période t ;

\sum_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone (613)951-9607.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de L'industrie, 1986 = 100: guide aux utilisateurs, \$40.00.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, \$25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, ou téléphonez au (613)951-9607.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

\sum_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone (613)951-9607.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, ou téléphonez au (613)951-9607.

¹ Indexes are listed in ascending order of their CANSIM D Code. – L'ordre de présentation des indices est par ordre croissant de leur code D de CANSIM.

² These CANSIM D codes refer to the monthly series. Annual averages are available through the same CANSIM D codes by requesting the Extended Display Option or by using RPT command of the CANSIM Interactive System (CIS). Users are advised to use the CANSIM D codes as identifiers. – Ces codes D de CANSIM permettent d'obtenir les séries mensuelles. Les moyennes annuelles sont disponibles via les mêmes codes D de CANSIM, soit en utilisant la commande "Extended Display Option", soit en faisant appel au Système Interactif CANSIM (SIC) via la commande RPT. Les usagers doivent de préférence utiliser les codes D de CANSIM en tant que numéros d'identification.

³ Link factors for petroleum products indexes were calculated for May 1990 due to the lag of one month for the calculation and publication of petroleum products indexes, in relation to all other individual IPPI series. Indexes affected are identified by an asterisk in front of their 1986 CANSIM D codes. – Les facteurs de raccordement pour les produits du pétrole ont été calculés pour le mois de mai 1990, en raison du délai d'un mois dans le calcul et publication des indices des produits du pétrole, en comparaison aux autres séries d'indices des prix des produits industriels. Les indices affectés sont identifiés par un astérisque devant le code de CANSIM pour 1986.

Appendix: Link factors for selected 1981 based Raw Materials Price Indexes¹Appendice: Facteurs de raccordement pour certains indices des prix des matières brutes basés sur 1981¹

What happened to the cost of living last month?

The Consumer Price Index will tell you.

Whether you negotiate wage settlements, administer COLA clauses in labour contracts, assess government policies or are involved in renewal contracts, child support or alimony payments, you need current and detailed information on changes in the cost of living.

Compiled monthly (and published within 20 days of the month's end), **The Consumer Price Index** gives you a precise account of the latest fluctuations in consumer prices.

This monthly publication covers:

- transportation
- health and personal care
- food
- recreation, reading and education
- clothing
- tobacco products and alcoholic beverages
- housing

Over 400 items, ranging from milk to parking, household furnishings to reading material, are included.

Price indexes are presented nationally and for 18 major Canadian cities. In each issue you receive month-to-month percentage comparisons and trends over the last five years. And each issue analyzes the main causes of change.

Get the facts.

Subscribe to **The Consumer Price Index** (Catalogue No. 62-001) for the authoritative measure of the purchasing power of the Canadian consumer dollar. A subscription to this monthly is available for \$93 in Canada, US\$112 in the United States and US\$130 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Qu'en était-il du coût de la vie le mois dernier ?

L'indice des prix à la consommation répond à votre question.

Que vous ayez à négocier des règlements salariaux, à administrer des clauses d'indemnité de vie chère ou à évaluer des politiques gouvernementales, que vous vous occupiez du renouvellement de contrats, de pensions alimentaires ou d'allocations d'entretien, vous avez besoin de données récentes et détaillées sur les fluctuations du coût de la vie.

Établi mensuellement, et publié dans les 20 jours suivant la fin de chaque mois, **L'indice des prix à la consommation** vous renseigne de façon précise sur les plus récentes fluctuations des prix à la consommation.

Cette publication mensuelle porte sur:

- l'alimentation
- l'habillement
- l'habitation
- le transport
- la santé et les soins personnels
- les loisirs, la lecture et la formation
- les produits du tabac et les boissons alcoolisées

Plus de 400 articles sont inclus, allant du lait au stationnement en passant par l'ameublement de maison et le matériel de lecture.

Les indices de prix sont donnés pour l'ensemble du pays et 18 principales villes canadiennes. Chaque numéro présente des comparaisons des pourcentages mois après mois et les tendances au cours des cinq dernières années. En outre, chaque numéro analyse les principales causes de changement.

Abonnez-vous !

L'indice des prix à la consommation (n° 62-001 au catalogue) vous permet d'obtenir une évaluation fiable du pouvoir d'achat du dollar canadien. L'abonnement à cette publication mensuelle coûte 93 \$ au Canada, 112 \$ US aux États-Unis et 130 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

How long would it take you to get 10,000 price quotes from 3,500 companies?

A lot longer than it takes to open a copy of **Industry Price Indexes**. Subscribe now, for the most extensive data available on Canadian manufacturing selling prices.

Industry Price Indexes are indispensable if you need current, consistent and reliable reports on price fluctuations at the Canadian factory gate. Uses include preparing escalation contracts, inventory management, charting trends, forecasting price changes or compiling data to create your own index.

This monthly publication covers raw materials, energy and over 700 commodities by 20 major groups. Items listed range from fish fillets to industrial furnaces, cattle to crude oil. Most commodities are reported at the national level, but some are given on a regional basis.

Each issue also provides a historical perspective, with tables of annual averages and monthly price indexes of commodities for the past five years.

As the only periodical of this scope and detail **Industry Price Indexes** is the recognized authority on changes in the selling prices of Canadian manufactured goods.

Get the facts.

A subscription to the monthly **Industry Price Indexes** (Catalogue No. 62-011) is \$182 in Canada, US\$218 in the United States and US\$255 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Combien de temps vous faudrait-il pour obtenir 10 000 propositions de prix de 3 500 compagnies ?

Beaucoup plus de temps qu'il n'en faut pour lire un exemplaire d'**Indices des prix de l'industrie**. Abonnez-vous dès maintenant afin d'avoir accès aux données les plus complètes possible sur les prix de vente des manufacturiers canadiens.

Indices des prix de l'industrie est indispensable si vous avez besoin de rapports à jour, uniformes et fiables au sujet des fluctuations des prix à la production au Canada. Ces indices peuvent servir notamment à préparer des contrats d'indexation, à gérer des stocks, à suivre des tendances au moyen de graphiques, à prévoir des fluctuations de prix ou à compiler des données pour concevoir votre propre indice.

Cette publication mensuelle porte sur les matières premières, l'énergie et plus de 700 produits classés dans 20 grandes catégories. Les articles répertoriés vont des filets de poisson aux fours industriels en passant par les bovins et le pétrole brut. Pour la plupart des produits, les statistiques ont une portée nationale; toutefois, pour certains, elles revêtent un caractère régional.

Chaque numéro donne également une perspective historique; des tableaux indiquent les moyennes annuelles et les indices des prix mensuels des produits au cours des cinq dernières années.

Indices des prix de l'industrie est le seul périodique aussi complet et détaillé. Il fait autorité en ce qui touche les fluctuations des prix de vente des marchandises fabriquées au Canada.

Abonnez-vous !

L'abonnement au mensuel **Indices des prix de l'industrie** (n° 62-011 au catalogue) coûte 182 \$ au Canada, 218 \$ US aux États-Unis et 255 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607)
or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(983-4020)

Highlights

Industrial Product Price Index (IPPI)

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986=100) edged up 0.1% to 109.2 in August 1990, from July's revised level of 109.1. This slight increase follows a 0.4% decrease in July 1990. The largest index increases this month were shown by the primary metal products (2.7%) followed by the estimated 1.2% increase for petroleum and coal products. These were partially offset by the decreases in the autos, trucks and other transport equipment (-0.7%), paper and paper products (-0.6%) and lumber, sawmill and other wood products (-0.8%). The 1.2% increase, in August, of the Canadian dollar versus its U.S. counterpart and its impact on prices of exported goods and products affected mainly the autos, trucks and other transportation equipment and paper and paper products indexes.

Since August 1989, the IPPI has fallen 0.3%. Since December 1989, the year-to-year rate has remained negative, except for February (0.1%). The year-to-year change was affected most by lower prices for primary metal products (-5.0%), chemical products (-2.8%) and paper and paper products (-2.5%). These were partially offset by higher prices for petroleum and coal products (3.9%), meat, fish and dairy products (2.8%), printing and publishing (2.8%) and beverages (3.2%). Excluding petroleum and coal products, the 12-month change was -0.5%.

Following an increase of 0.5% in July 1990, the primary metal products index rose 2.7% in August. Increases of 23.7% for nickel products and 6.0% for copper and copper alloy products led the way. No major component registered a decline this month though the 0.1% increase in the iron and steel products index moderated the overall increase. The primary metal products index which had shown in January 1990 a year-to-year change of -17.9%, was down by only 5.0% in August, with decreases ranging from 19.2% for nickel products to 1.7% for iron and steel products and only 1.4% for other non-ferrous metal products. Only copper and copper alloy products rose over the last 12 months, up 5.2%.

According to initial estimates, the petroleum and coal products price index rose 1.2% during the past month, largely as a result of higher prices for fuel oil. Over 12 months, the petroleum and coal index has risen 3.9%.

The index for paper and paper products showed a decrease of 0.6% in August, reflecting the downward effect of the exchange rate on export prices for newsprint paper and also a 1.3% drop in the index for the pulp group. The downward movement of the pulp price index was largely responsible for the 2.5% decline in the paper and paper products price index over the last 12 months.

The index for lumber, sawmill and other wood products posted a drop of 0.8% in August 1990, due mainly to declines for lumber and timber, down 1.0%, and veneer and plywood, down 3.8%. This reflected lower prices for lumber, softwood in British Columbia (-1.5%) and for Douglas fir plywood (-7.5%) and plywood, other than Douglas fir (-4.2%). Over the last 12 months, the index for lumber, sawmill and other wood products declined 3.0%, reflecting the same downward movements.

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1986=100) se situait en août 1990 à 109.2, en hausse de 0.1% par rapport au niveau révisé de 109.1 de juillet 1990. Cette légère hausse suit une baisse de 0.4% affichée en juillet 1990. Les principales augmentations ce mois-ci ont été affichées par l'indice des produits métalliques primaires (2.7%), suivi par la hausse estimative de 1.2% pour les produits du pétrole et du charbon. Celles-ci ont été presque complètement compensées par les baisses affichées par les indices des autos, camions et autre matériel de transport (-0.7%), du papier et ses produits connexes (-0.6%) et des sciages, produits de scierie et divers (-0.8%). La hausse de 1.2% du dollar canadien face au dollar américain en août et son impact sur les prix à l'exportation a principalement affecté le groupe des voitures, camions et autre matériel de transport ainsi que celui du papier et produits connexes.

Depuis août 1989, l'IPPI a décliné de 0.3%. Depuis décembre 1989, le taux annuel est demeuré négatif sauf pour le mois de février (0.1%). La variation d'une année à l'autre a été influencée surtout par la baisse des prix des produits métalliques primaires (-5.0%), des produits chimiques (-2.8%) et du papier et produits connexes (-2.5%). Ces diminutions ont été partiellement neutralisées par les augmentations des prix des produits du pétrole et du charbon (3.9%), des viandes, poissons et produits laitiers (2.8%), de l'impression et l'édition (2.8%) et des boissons (3.2%). Sans les produits du pétrole et du charbon, la variation sur 12 mois s'est établie à -0.5%.

Après avoir connu une hausse de 0.5% en juillet 1990, l'indice des produits métalliques primaires a affiché une augmentation de 2.7% en août 1990. Les augmentations enregistrées par les produits du nickel (23.7%) et par les produits du cuivre et les alliages de cuivre (6.0%) ont mené le groupe. Aucune composante principale n'a affiché une baisse ce mois-ci bien que la hausse de 0.1% montrée par les produits du fer et de l'acier ait eu un effet modérateur sur le mouvement à la hausse. L'indice des produits métalliques primaires qui a montré un taux de variation annuel de -17.9% en janvier 1990 n'affichait plus qu'un taux de -5.0% en août, les diminutions allant de 19.2% pour les produits du nickel à 1.7% pour les produits du fer et de l'acier et à seulement 1.4% pour les autres produits de métaux non ferreux. Seule la composante des produits du cuivre et alliages de cuivre a affiché une augmentation (5.2%).

D'après les premières estimations, l'indice des prix des produits du pétrole et du charbon a augmenté de 1.2% au cours du dernier mois écoulé, suite surtout à la hausse affichée par les mazouts. Au cours des 12 derniers mois, l'indice du pétrole et du charbon a affiché une hausse de 3.9%.

L'indice du papier et produits connexes a affiché une baisse de 0.6% en août, en partie due à l'impact du taux de change sur les prix à l'exportation du papier journal et en raison de la baisse de 1.3% pour le groupe des pâtes de bois. Le mouvement à la baisse du groupe des pâtes de bois est principalement responsable de la baisse de 2.5% de l'indice des prix du papier et produits connexes au cours des 12 derniers mois.

L'indice des sciages, produits de scierie et divers a affiché une baisse de 0.8% au cours du mois d'août 1990, en raison surtout des baisses pour les sciages et bois d'oeuvre (-1.0%) et les placages et contre-plaqués (-3.8%). Ceci reflétait les prix inférieurs pour le bois de construction, de résineux venant de la Colombie-Britannique (-1.5%), le contre-plaqué de sapin de Douglas (-7.5%) et le contre-plaqué, autre que sapin de Douglas (-4.2%). Au cours des 12 derniers mois, l'indice des sciages, produits de scierie et divers a reculé de 3.0%, reflétant les mêmes mouvements à la baisse.

Highlights

Raw Materials Price Index

Due primarily to a 16.1% increase in the index for mineral fuels, the Raw Materials Price Index (RMPI, 1986=100) increased 4.2% between July and August 1990 to a preliminary level of 107.3. The RMPI excluding the mineral fuels component decreased by 0.2%. Between August 1989 and August 1990, the RMPI decreased 0.5%, and the RMPI excluding the mineral fuels component declined 1.3%. Five of the seven categories comprising the RMPI decreased.

The most significant contributor to the monthly increase in mineral fuels was a sharp increase in crude mineral oil prices of 17.5%, which occurred after five consecutive months of decreasing prices. The crude mineral oil price change was greater between July and August 1990 than it has been between any two months for over three years. Compared to August 1989, of the three components comprising mineral fuels, natural gas rose 0.2%, coal declined 2.8%, and crude mineral oil increased 1.5%.

A monthly decrease in the vegetable products index of 3.6% was due primarily to a decrease in the index for grains of 7.5%. Also an annual decrease of 9.2% in vegetable products was due mostly to a 15.2% decrease in grain prices, in addition to price declines in raw tobacco (-3.9%) and unrefined sugar (-20.7%).

From July, the wood index decreased by 2.5% as log and bolts prices were down by 3.7%. From last August the index declined by 3.4%.

The non-ferrous metals index increased 5.3% over the month. Most components in this index went up, the most notable increases being for nickel concentrates (25.0%) and copper (6.2%). The nickel index is, however, still 18.0% under its August 1989 level, contributing chiefly to an annual decline in the non-ferrous metal index of 0.6%.

Over the year, the animal and animal products index was up by 3.4%. Prices of hogs increased 14.7% and fish prices were up by 10.1%, while prices for animal textile fibres were down by 32.9%.

Faits saillants

Indice des prix des matières brutes

En raison principalement de la hausse de 16.1% de l'indice des combustibles minéraux, l'indice des prix des matières brutes (IPMB, 1986=100) a augmenté de 4.2% entre juillet et août 1990, pour atteindre un niveau préliminaire de 107.3. L'IPMB sans la composante des combustibles minéraux a diminué de 0.2%. Entre août 1989 et août 1990, l'IPMB a diminué de 0.5%, et l'IPMB sans les combustibles minéraux a baissé de 1.3%. Cinq des sept composantes de l'IPMB ont diminué au cours des douze derniers mois.

La contribution la plus importante au mouvement mensuel de l'indice des combustibles minéraux est venue de la forte hausse (17.5%) des prix des huiles minérales brutes, augmentation qui est apparue suite à cinq baisses mensuelles consécutives. Le changement de prix des huiles minérales brutes a été plus important entre les mois de juillet et août 1990 qu'il n'a été entre deux mois depuis plus de trois ans. En comparant avec le mois d'août 1989, des trois composantes comprises dans les combustibles minéraux, le gaz naturel a affiché une hausse de 0.2%, le charbon a diminué de 2.8% et les huiles minérales brutes ont augmenté de 1.5%.

L'indice des substances végétales a connu une baisse mensuelle de 3.6% en raison de la diminution de 7.5% de l'indice des céréales. Au cours des douze derniers mois, l'indice des substances végétales a baissé de 9.2%, en raison principalement de la baisse de 15.2% des prix des céréales jumelée aux diminutions de prix pour le tabac en feuille (-3.9%) et le sucre non raffiné (-20.7%).

Par rapport à juillet 1990, l'indice du bois a diminué de 2.5% alors que les prix pour les billes et les billots ont fléchi de 3.7%. Par rapport au mois d'août 1989, l'indice a affiché une baisse de 3.4%.

L'indice des métaux non ferreux a augmenté de 5.3% au cours du dernier mois. La grande majorité des composantes de cet indice ont montré une hausse, les plus significatives ont été pour les concentrés du nickel (25.0%) et du cuivre (6.2%). Par contre l'indice pour les concentrés du nickel est demeuré à 18.0% sous son niveau d'août 1989, poussant l'indice des métaux non ferreux à un taux annuel de changement de -0.6%.

Au cours de la dernière année, l'indice des animaux et substances animales a augmenté de 3.4%. Les prix pour le porc ont augmenté de 14.7% et ceux des poissons de 10.1%, alors que les prix pour les fibres d'origine animale affichaient une baisse de 32.9%.

(1) Revised.

(1) Révisé.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates either a split of the M-level commodity,

or 91, which indicates a special aggregation

or 99, which indicates special details.

pppp indicates the PCG code (except for some special aggregations which include several PCGs).

rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate.

For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling.

The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

ss indique le code du niveau S des produits (de 9 à 28)

mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)

nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.

pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Note: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agregation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indice des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabilistes, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

\sum_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone (613)951-9607.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de L'industrie, 1986 = 100: guide aux utilisateurs, \$40.00.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, \$25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, ou téléphonez au (613)951-9607.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à a période courante t;

\sum_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Reference Document

See reference document in IPPI. Document contains the weighting pattern of the Raw Materials price Indexes (RMPI).

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone (613)951-9607.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Document de référence

Voir le document de référence de l'IPPI, qui contient le schéma de pondération des indices de prix des matières brutes (IPMB).

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone (613)951-9607.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, ou téléphonez au (613)951-9607.

What happened to the cost of living last month?

The Consumer Price Index will tell you.

Whether you negotiate wage settlements, administer COLA clauses in labour contracts, assess government policies or are involved in renewal contracts, child support or alimony payments, you need current and detailed information on changes in the cost of living.

Compiled monthly (and published within 20 days of the month's end), **The Consumer Price Index** gives you a precise account of the latest fluctuations in consumer prices.

This monthly publication covers:

- transportation
- food
- clothing
- housing
- health and personal care
- recreation, reading and education
- tobacco products and alcoholic beverages

Over 400 items, ranging from milk to parking, household furnishings to reading material, are included.

Price indexes are presented nationally and for 18 major Canadian cities. In each issue you receive month-to-month percentage comparisons and trends over the last five years. And each issue analyzes the main causes of change.

Get the facts.

Subscribe to **The Consumer Price Index** (Catalogue No. 62-001) for the authoritative measure of the purchasing power of the Canadian consumer dollar. A subscription to this monthly is available for \$93 in Canada, US\$112 in the United States and US\$130 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Qu'en était-il du coût de la vie le mois dernier ?

L'indice des prix à la consommation répond à votre question.

Que vous ayez à négocier des règlements salariaux, à administrer des clauses d'indemnité de vie chère ou à évaluer des politiques gouvernementales, que vous vous occupiez du renouvellement de contrats, de pensions alimentaires ou d'allocations d'entretien, vous avez besoin de données récentes et détaillées sur les fluctuations du coût de la vie.

Établi mensuellement, et publié dans les 20 jours suivant la fin de chaque mois, **L'indice des prix à la consommation** vous renseigne de façon précise sur les plus récentes fluctuations des prix à la consommation.

Cette publication mensuelle porte sur:

- l'alimentation
- l'habillement
- l'habitation
- le transport
- la santé et les soins personnels
- les loisirs, la lecture et la formation
- les produits du tabac et les boissons alcoolisées

Plus de 400 articles sont inclus, allant du lait au stationnement en passant par l'ameublement de maison et le matériel de lecture.

Les indices de prix sont donnés pour l'ensemble du pays et 18 principales villes canadiennes. Chaque numéro présente des comparaisons des pourcentages mois après mois et les tendances au cours des cinq dernières années. En outre, chaque numéro analyse les principales causes de changement.

Abonnez-vous !

L'indice des prix à la consommation (n° 62-001 au catalogue) vous permet d'obtenir une évaluation fiable du pouvoir d'achat du dollar canadien. L'abonnement à cette publication mensuelle coûte 93 \$ au Canada, 112 \$ US aux États-Unis et 130 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

How long would it take you to get 10,000 price quotes from 3,500 companies?

A lot longer than it takes to open a copy of **Industry Price Indexes**. Subscribe now, for the most extensive data available on Canadian manufacturing selling prices.

Industry Price Indexes are indispensable if you need current, consistent and reliable reports on price fluctuations at the Canadian factory gate. Uses include preparing escalation contracts, inventory management, charting trends, forecasting price changes or compiling data to create your own index.

This monthly publication covers raw materials, energy and over 700 commodities by 20 major groups. Items listed range from fish filets to industrial furnaces, cattle to crude oil. Most commodities are reported at the national level, but some are given on a regional basis.

Each issue also provides a historical perspective, with tables of annual averages and monthly price indexes of commodities for the past five years.

As the only periodical of this scope and detail **Industry Price Indexes** is the recognized authority on changes in the selling prices of Canadian manufactured goods.

Get the facts.

A subscription to the monthly **Industry Price Indexes** (Catalogue No. 62-011) is \$182 in Canada, US\$218 in the United States and US\$255 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Combien de temps vous faudrait-il pour obtenir 10 000 propositions de prix de 3 500 compagnies ?

Beaucoup plus de temps qu'il n'en faut pour lire un exemplaire d'**Indices des prix de l'industrie**. Abonnez-vous dès maintenant afin d'avoir accès aux données les plus complètes possible sur les prix de vente des manufacturiers canadiens.

Indices des prix de l'industrie est indispensable si vous avez besoin de rapports à jour, uniformes et fiables au sujet des fluctuations des prix à la production au Canada. Ces indices peuvent servir notamment à préparer des contrats d'indexation, à gérer des stocks, à suivre des tendances au moyen de graphiques, à prévoir des fluctuations de prix ou à compiler des données pour concevoir votre propre indice.

Cette publication mensuelle porte sur les matières premières, l'énergie et plus de 700 produits classés dans 20 grandes catégories. Les articles répertoriés vont des filets de poisson aux fours industriels en passant par les bovins et le pétrole brut. Pour la plupart des produits, les statistiques ont une portée nationale; toutefois, pour certains, elles revêtent un caractère régional.

Chaque numéro donne également une perspective historique; des tableaux indiquent les moyennes annuelles et les indices des prix mensuels des produits au cours des cinq dernières années.

Indices des prix de l'industrie est le seul périodique aussi complet et détaillé. Il fait autorité en ce qui touche les fluctuations des prix de vente des marchandises fabriquées au Canada.

Abonnez-vous !

L'abonnement au mensuel **Indices des prix de l'industrie** (n° 62-011 au catalogue) coûte 182 \$ au Canada, 218 \$ US aux États-Unis et 255 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607)
or to the Statistics Canada reference centre in:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Highlights

Industrial Product Price Index (IPPI)

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) rose 0.7% to 109.9 in September 1990, from August's revised level of 109.1. This increase, the largest monthly one since February 1990, follows three months of decrease or no change. The largest index increases this month were shown by the tobacco and tobacco products (7.8%), followed by the petroleum and coal products, estimated at 3.0%, and primary metal products (1.5%). These were partially offset by the decrease in fruits, vegetables, feeds and miscellaneous food products (-0.3%). The 1.9% increase, in September, of the U.S. dollar versus its Canadian counterpart and its impact on prices of exported goods and products affected mainly the autos, trucks and other transportation equipment (1.2%) and paper and paper products (0.6%) indexes.

Since September 1989, the IPPI has risen 0.6%. Since December 1989, the year-to-year rate had remained negative, except for February (0.1%). The year-to-year change was affected most by higher prices for petroleum and coal products (7.3%), meat, fish and dairy products (3.3%), printing and publishing (3.2%) and tobacco and tobacco products (13.0%). These were partially offset by lower prices for primary metal products (-1.7%), chemical products (-1.2%), paper and paper products (-2.3%) and lumber, sawmill and other wood products (-3.2%). Excluding petroleum and coal products, the 12-month change was 0.3%.

Following increases of 0.4% and 2.8% in July and August 1990, the primary metal products index rose 1.5% in September. Increases of 7.1% for aluminum products and 2.4% for nickel products led the way. The other non-ferrous metal products component was the only one to show a decrease, down 1.7% due mainly to lower prices for precious metals. The primary metal products index which showed in January 1990 a year-to-year change of -17.9%, was down by only 1.7% in September, with decreases ranging from 4.9% for aluminum products to 1.0% for iron and steel products. The nickel products index was the only one to rise over the last 12 months, up 4.1%.

According to initial estimates, the petroleum and coal products price index rose 3.0% during the past month, reflecting a general pattern of higher prices for most petroleum products. Over 12 months, the petroleum and coal index has risen 7.3%.

The tobacco and tobacco products index was up 7.8% this month due chiefly to higher prices for cigarettes (10.4%), cigars and cigarillos (8.9%) and smoking tobacco (7.1%). Over the last 12 months the tobacco products index has risen 13.0%.

The fruits, vegetables, feeds and miscellaneous food products index edged down 0.3% in September 1990, due mainly to lower prices for fruit (-1.0%) and vegetable (-1.5%) preparations as well as prepared feeds (-1.7%).

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1986 = 100) se situait en septembre 1990 à 109.9, en hausse de 0.7% par rapport au niveau révisé de 109.1 d'août 1990. Cette hausse, la plus forte hausse mensuelle depuis février 1990, suit trois mois avec baisse ou sans changement. Les principales augmentations ce mois-ci ont été affichées par l'indice du tabac et des produits du tabac (7.8%) suivi par la hausse estimative de 3.0% pour les produits du pétrole et du charbon et celle de 1.5% pour les produits métalliques primaires. Celles-ci ont été compensées partiellement par la baisse affichée par l'indice des fruits, légumes, aliments pour animaux et produits divers (-0.3%). La hausse de 1.9% du dollar américain face au dollar canadien en septembre et son impact sur les prix à l'exportation a principalement affecté le groupe des voitures, camions et autre matériel de transport (1.2%) ainsi que celui du papier et produits connexes (0.6%).

Depuis septembre 1989, l'IPPI a augmenté de 0.6%. Depuis décembre 1989, le taux annuel était demeuré négatif sauf pour le mois de février (0.1%). La variation d'une année à l'autre a été influencée surtout par la hausse des prix des produits du pétrole et du charbon (7.3%), des viandes, poissons et produits laitiers (3.3%), de l'impression et l'édition (3.2%) et du tabac et des produits du tabac (13.0%). Ces augmentations ont été partiellement neutralisées par les diminutions des prix des produits métalliques primaires (-1.7%), des produits chimiques (-1.2%), du papier et produits connexes (-2.3%) et des sciages, produits de scierie et produits divers (-3.2%). Sans les produits du pétrole et du charbon, la variation sur 12 mois s'est établi à 0.3%.

Après avoir connu des hausses de 0.4% et 2.8% en juillet et août 1990, l'indice des produits métalliques primaires a affiché une augmentation de 1.5% en septembre 1990. Les augmentations enregistrées par les produits de l'aluminium (7.1%) et par les produits du nickel (2.4%) ont mené le groupe. La composante des autres produits de métaux non ferreux a été la seule à affiché une baisse ce mois-ci, avec un recul de 1.7% en raison surtout des prix inférieurs pour les métaux précieux. L'indice des produits métalliques primaires qui a montré un taux de variation annuel de -17.9% en janvier 1990 n'affichait plus qu'un taux de -1.7% en septembre, les diminutions allant de 4.9% pour les produits de l'aluminium à 1.0% pour les produits du fer et de l'acier. Seule la composante des produits du nickel a affiché une augmentation (4.1%) au cours des 12 derniers mois.

D'après les premières estimations, l'indice des prix des produits du pétrole et du charbon a augmenté de 3.0% au cours du dernier mois écoulé, suite à la hausse générale des prix affichée par la majorité des produits pétroliers. Au cours des 12 derniers mois, l'indice du pétrole et du charbon a affiché une hausse de 7.3%.

L'indice du tabac et des produits du tabac a augmenté de 7.8% ce mois-ci, en raison surtout des prix plus élevés pour les cigarettes (10.4%), pour les cigares et cigarillos (8.9%) et pour le tabac à fumer (7.1%). Au cours des derniers 12 mois, l'indice du tabac et produits du tabac a connu une hausse de 13.0%.

L'indice des fruits, légumes, aliments pour animaux et produits divers a fléchi de 0.3% en septembre 1990, en raison principalement de prix moins élevés pour les préparations à base de fruits (-1.0%) et à base de légumes (-1.5%) ainsi que pour les aliments préparés pour les animaux (-1.7%).

Highlights

Raw Materials Price Index

The Raw Materials Price Index (RMPI, 1986=100) rose 10.3% between August and September 1990 to a preliminary level of 118.5. This is the largest monthly increase since the RMPI was introduced in 1977. The RMPI excluding the mineral fuels component declined by 0.9%. Of the seven components of the RMPI, three rose in September and four fell. Between September 1989 and September 1990, the RMPI increased by 11.8%. The RMPI excluding the mineral fuels component declined 0.5%.

The mineral fuels index was up 36.8% from its level in August, as a result of an estimated 39.4% increase in the index for crude mineral oil in September. These monthly jumps are the largest recorded for each index. The mineral fuels index was up 41.8% from September 1989, due largely to higher prices for crude mineral oil, up 44.6%. During 1981, annual percentage changes were similar, sometimes larger. This year, however, prices have risen more suddenly; the increase in crude oil prices since June was 60.0%.

Compared to last month, the vegetable products index decreased by 1.0% as grain and oilseed prices continued to decline by 4.6% and 1.9% respectively. Compared to the same month a year ago, the index declined 9.6%; also as a result of lower prices for grains (-17.8%), oilseeds (-1.7%), and unrefined sugar (-18.5%). A partially offsetting effect came from higher prices for cocoa, coffee & tea (9.9%).

The animal and animal products index was down over the month, by 1.7%. Lower prices were recorded for red meat animals: cattle for slaughter (-0.9%), calves for slaughter (-5.0%), hogs (-10.9%) and sheep and lambs (-10.1%). Increases in the prices for hogs (15.1%), cattle for slaughter (2.2%) and fish (12.5%) were largely responsible for the animal and animal products index to have risen by 4.4% over the year.

The non-ferrous metals index was up by 1.2% over the month. Prices increased for concentrates of copper (1.0%), and nickel (1.3%) and for aluminum materials (8.9%). Over the year, the index rose 0.3%.

The wood index decreased 2.1% during last month and 2.5% during the last twelve months, as prices were lower for both of its components: logs and bolts, and pulpwood in both comparisons.

Faits saillants

Indice des prix des matières brutes

L'indice des prix des matières brutes (IPMB, 1986=100) a augmenté de 10.3% entre août et septembre 1990 pour s'établir au niveau préliminaire de 118.5. Il s'agit de l'augmentation mensuelle la plus importante depuis que l'IPMB a été introduit en 1977. Sans la composante des combustibles minéraux, l'IPMB a baissé de 0.9%. Des sept composantes de l'IPMB, trois ont augmenté en septembre et quatre ont diminué. Entre septembre 1989 et septembre 1990, l'IPMB a progressé de 11.8%. L'IPMB sans les combustibles minéraux a baissé de 0.5%.

L'indice des combustibles minéraux a été en hausse de 36.8% par rapport au niveau d'août, en raison de l'augmentation estimative de 39.4% de l'indice des huiles minérales brutes en septembre. Ces hausses mensuelles sont les plus importantes enregistrées jusqu'ici pour chaque indice. L'indice des combustibles minéraux a augmenté de 41.8% par rapport à septembre 1989, en raison surtout de l'augmentation de 44.6% des prix des huiles minérales brutes. En 1981, le taux de variation annuel était semblable, même parfois plus élevé. Toutefois, cette année, les prix ont augmenté de façon plus soudaine; depuis juin, les prix du pétrole brut ont enregistré une hausse de 60.0%.

Au cours du mois écoulé, l'indice des substances végétales a régressé de 1.0% car les prix des céréales et des graines oléagineuses ont continué à baisser respectivement de 4.6% et de 1.9%. L'indice a baissé de 9.6% par rapport au même mois l'année précédente; ceci était dû aussi à la baisse des prix des céréales (-17.8%), des graines oléagineuses (-1.7%) et du sucre non raffiné (-18.5%). La hausse des prix du cacao, du café et du thé (9.9%) a compensé partiellement cette baisse.

L'indice des animaux et des substances animales a fléchi de 1.7% dans le mois. On a enregistré une baisse des prix des bovins de boucherie (-0.9%), des veaux de boucherie (-5.0%), des porcs (-10.9%) et des moutons (-10.1%). La progression de 4.4% sur un an de l'indice des animaux et substances animales s'explique en grande partie par les augmentations des prix du porc (15.1%), des bovins de boucherie (2.2%) et du poisson (12.5%).

L'indice des métaux non ferreux a augmenté de 1.2% en septembre. On a observé une augmentation des prix des concentrés de cuivre (1.0%) et du nickel (1.3%) ainsi que des matériaux d'aluminium (8.9%). En un an, l'indice a augmenté de 0.3%.

L'indice du bois a diminué de 2.1% en septembre et de 2.5% au cours des douze derniers mois, les prix de ses deux composantes, les billes et billots et le bois à pâte, étant en baisse dans chaque cas.

(1) Revised

(1) Révisé

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal

Note: Indexes for the most recent six months shown in italics.																		

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates either a split of the M-level commodity,

or 91, which indicates a special aggregation

or 99, which indicates special details

pppp indicates the PCG code (except for some special aggregations which include several PCGs).

rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

ss indique le code du niveau S des produits (de 9 à 28)

mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)

nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.

pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence. Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).
